

How do I Express Verify My Calves?

Before Express Verifying your animals, you will need an account with the CCIA, a valid Express purchase certificate, your RFID tag numbers and if the animals are not age verified, you will need their birth dates.

Accepting the protocol. (only needs to be done once)

- Log into the CCIA's Canadian Livestock Tracking System website: www.clia.livestockid.ca
- Click My Account
- Click on the Protocol Tab (if you can't see the protocol tab, call 1-800-263-5103 ext. 4499)
- You will see Express Verified Vaccination Requested (Accept, Reject)
 - Click Accept

Express Verifying using File Upload function.

- Download the Express Verified Template from expressverified.ca
- Fill in all the required fields as though Age Verifying
 - For Event Type Select
 - BI_EVGBD – to Age Verify and Express Verify animals
 - BI_EVG – to Express Verify animals already age verified
 - For the BI_EVGID Column
- Enter your Express Purchase Certificate number
- On the CCIA website, select file upload and follow all the same steps you would if age verifying your calves normally.

Note that it may take up to 24 hours for the CCIA database to process your upload and Express Verify your calves. Also note that attempting to Express Verify more calves than Express doses purchases may result in failure to Express Verify your calves.

I don't have my Express Purchase Certificate. Am I out of luck?

If you've lost your Express Purchase Certificate or never received one when you purchased Express for use pre-breeding in your cow herd, contact your veterinarian. Your veterinarian may have a copy or will be able to access one through their Boehringer Ingelheim Canada Ltd. representative.
